Choice by
Design
Smartech™

Smartech Landscape Architectural Products provide excellent design solutions for pergolas, window shrouds, fences, privacy screens and other outdoor features . . .

Smartech[™]
Moving spaces.

SmartechTM

Moving spaces.

Due to Smartech's unique design, the option for LEDs to be run along the length of certain extrusions as seen in the renders, can create a seamless illumination of your outdoor area while highlighting the definition of your outdoor feature. The extrusions also accommodate the possibility of laser cut screens between battens, to add an even further depth to your design.

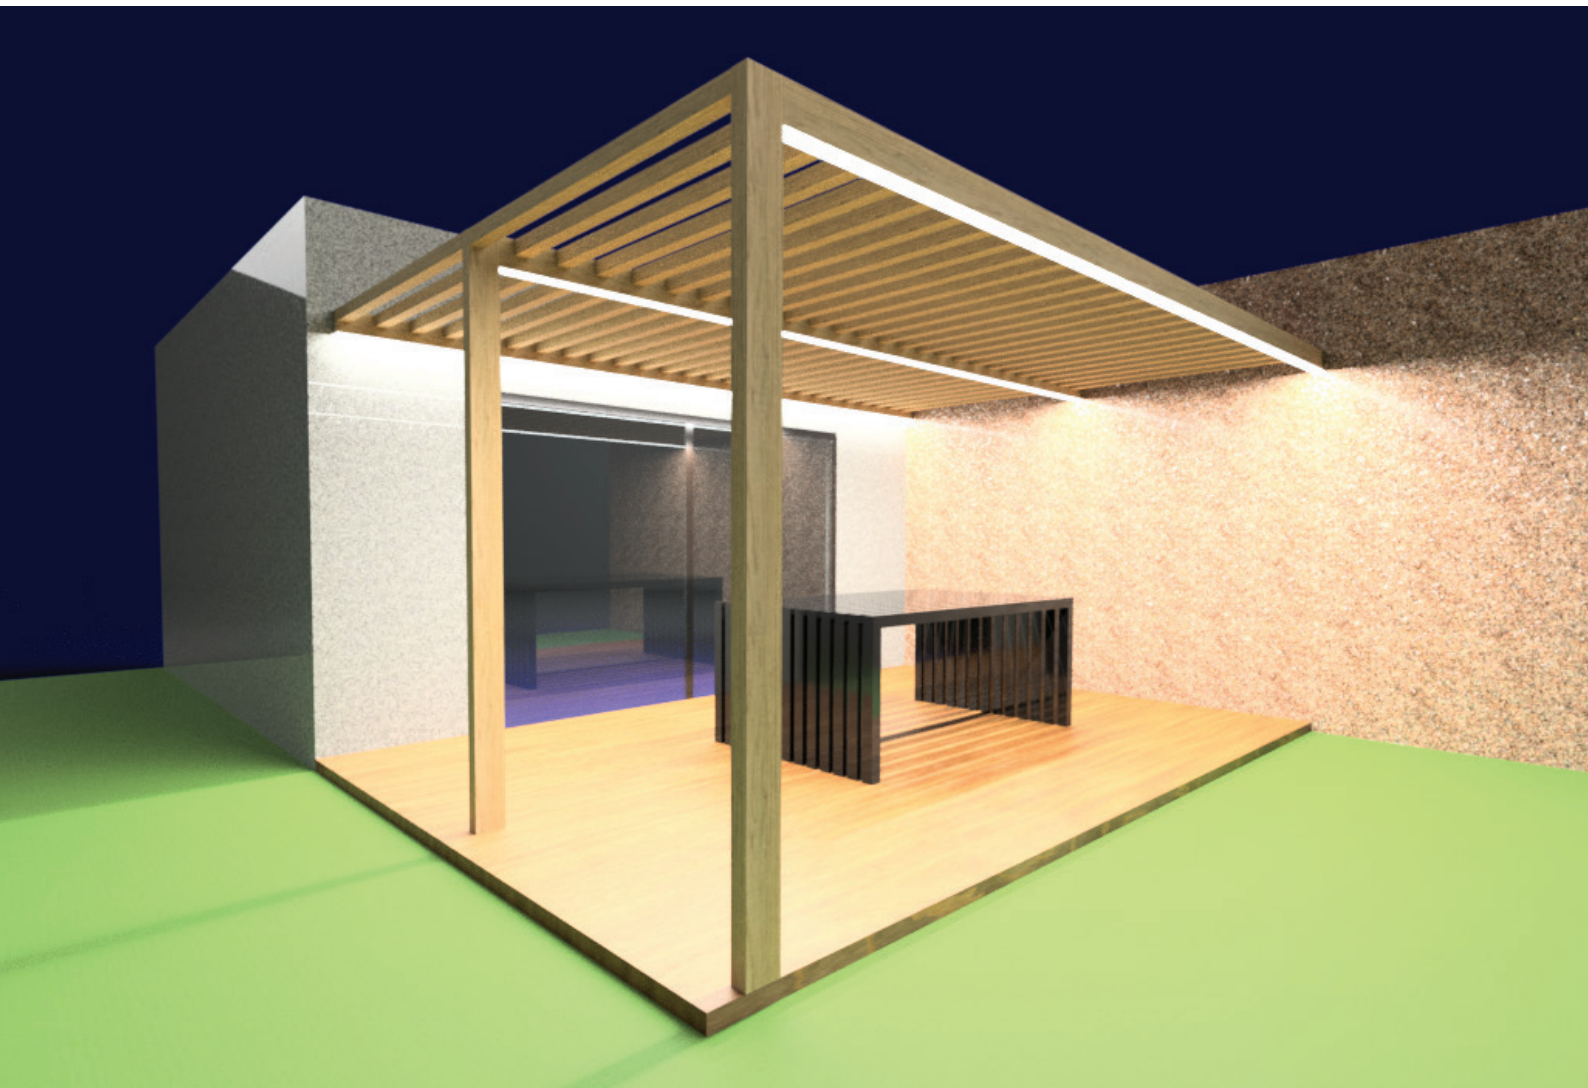

Our structures are designed with time efficiency and the harshest of outdoor conditions in mind, therefore as well as being easily constructed, most components are developed to readily be replaced.

Smartech™
pergolas are
designed for
longevity, simple
installs and most
importantly for a
luxurious aesthetic.

The versatility and flexibility of designs Smartech offers, is to allow us to help you complete your dream outdoor area.

Smartech™

ALUMINIUM PERGOLAS

Pergolas have become a staple of many Australian homes. A pergola extends your living space and adds a lovely enhancement to the outdoor area.

Smartech designed pergolas are designed for longevity, are beautiful and add a true sense of elegance to any deck, yard space or patio.

From our broad range of designs, the aluminium structures can serve many functional purposes including providing relief from the harsh direct sun while still allowing for adequate light penetration and

air circulation of the area. Hence a pergola will create a definite space in your outdoor area to entertain, creating an intermediate between your home and the outside area.

Smartech Pergolas can be fully customised to suit both your needs and budget, hence full flexibility in design allows us to meet the functionality and the look that will meet all your specific requirements thus providing you with the perfect pergola for your outdoor space.

FENCES & PRIVACY SCREENS

The durability and versatility of aluminium, paired with Smartech's engineering allows for an incredibly diverse range of design for fences and privacy screens.

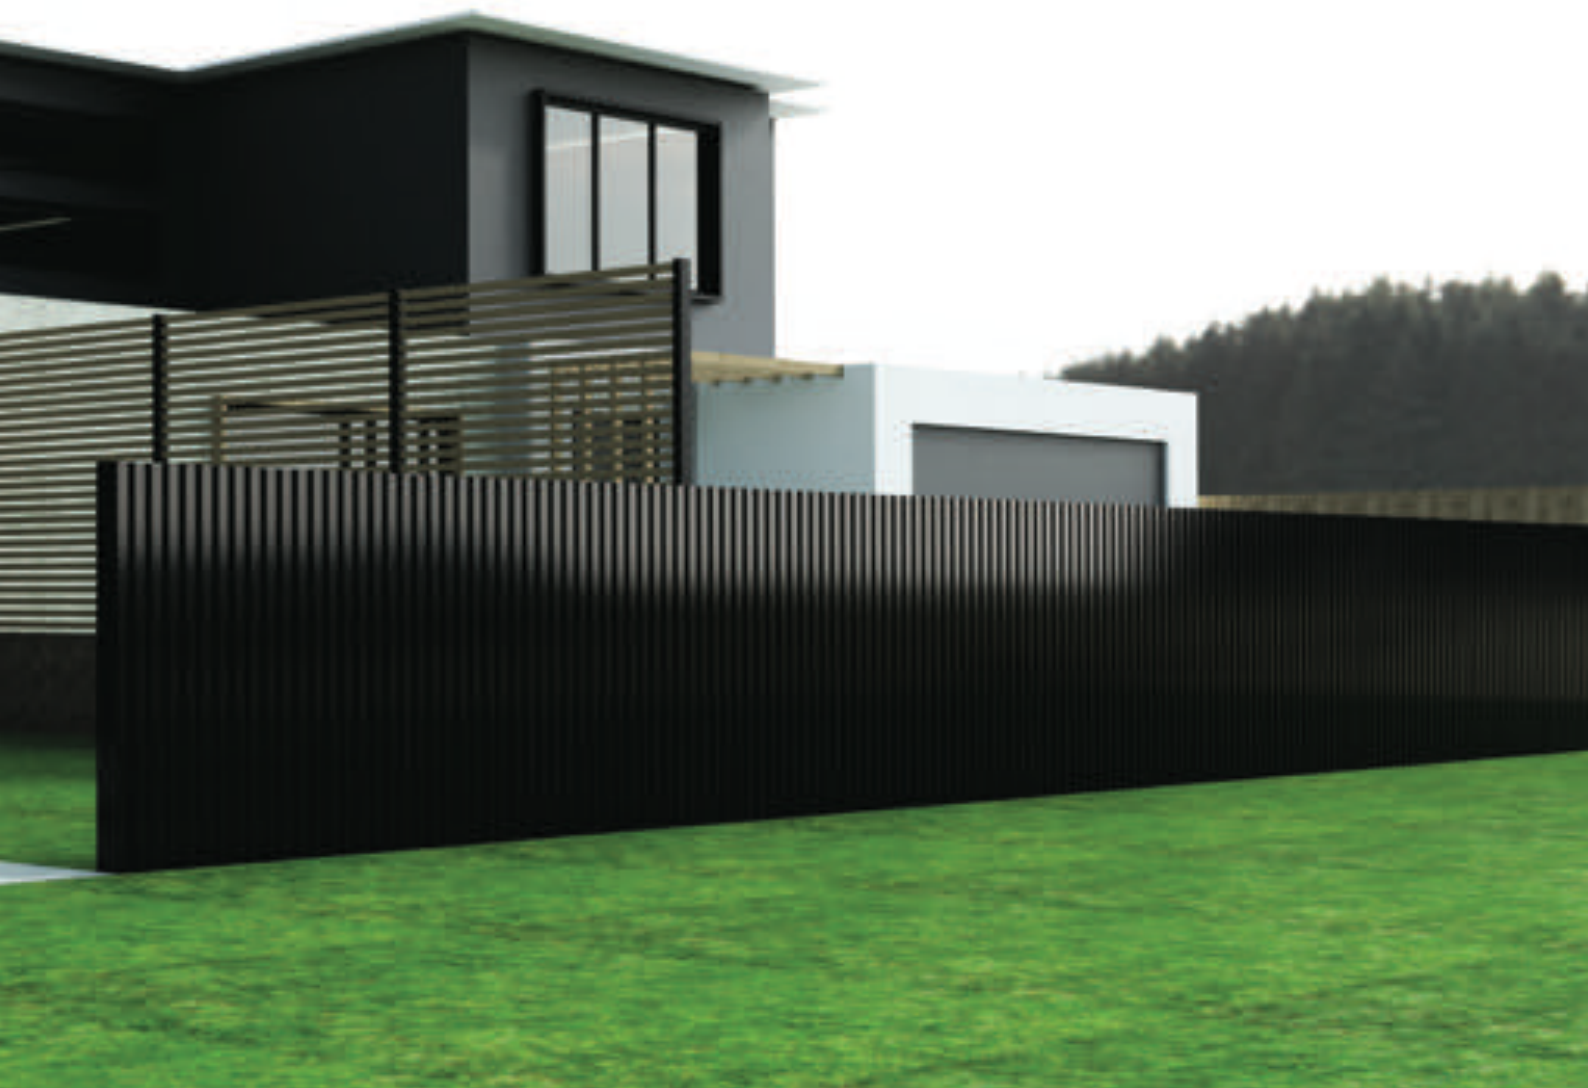

A fence/privacy screen is the perfect way to add a sense of privacy and structure to any outdoor area. They are no longer just to secure space and mark boundaries, but they are now widely used as the edging to frame your garden, highlight your landscape design or as the focal point for your frontage.

The durability and versatility of aluminium, paired with Smartech's engineering allows for an incredibly diverse range of designs for

fences/privacy screens. Our goal is to create innovative designs tailored to meet your specific requirements giving you the fence/privacy that will enhance both the appearance and functionality of your property.

Smartech's range of extrusions allows for endless possibilities, including the ability for two-tone and woodgrain powder coating finishes so you can skip the endless maintenance of dated wooden features.

Our goal is to create innovative designs tailored to your desire, that are easy to install without sacrificing aesthetics.

WINDOW SHROUDS & ALUMINIUM BATTEN FEATURES

Your Project
Your Colour Choice

At Smartech we are dedicated to improving on the external aesthetics of any window.

With the continuously changing architecture and home design trends, windows and doors have come a long way from being boring to becoming a beautiful stand out feature of your home. Whether you're looking for innovation, elegant craftsmanship, or architectural style, you will find it with Smartech's full range of window shrouds and aluminium batten features.

Window Shrouds

As you can see on the images, our window shrouds add a whole new look to the standard window by creating depth along with any colour to compliment the modern look of your home. Smartech's extrusion design allows for a two-tone powder coating finish to achieve any desired look.

Aluminium Batten Features

If you want to turn a front door into an entrance that makes a statement, aluminium batten features are an ideal solution. They add another level of style, texture, and visual interest to the outside of your home.

The combination of aluminium extrusion and powder coating means that you get a durable product that does not rust, rot, splinter or require any on-going maintenance. The two-tone powder coating finish achieves almost any desired look including authentic looking rust and wood-grain designs.

You can also highlight your statement feature even further with optional LED lights along the length of certain extrusions as shown in the image.
